Form 5498: Individual Retirement Arrangement Information

(These are IRS instructions that we are required to provide to you.)

Instructions to Participant

The information on Form 5498 is submitted to the Internal Revenue Service by the trustee or issuer of your individual retirement arrangement (IRA) to report contributions, including any catch-up contributions, and the fair market value of the account. For information about IRAs, see Pub. 590, Individual Retirement Arrangements (IRAs), and Pub. 560, Retirement Plans for Small Business (SEP, SIMPLE, and Qualified Plans).

Account number. May show an account or other unique number the payer assigned to distinguish your account.

Box 1. Shows traditional IRA contributions for 2008 you made in 2008 and through April 15, 2009. These contributions may be deductible on your Form 1040 or 1040A. However, if you or your spouse was an active participant in an employer's pension plan, these contributions may not be deductible. This box does not include amounts in boxes 2-4 and 8-10.

Box 2. Shows any rollover, including a direct rollover to a traditional IRA, you made in 2008. It does not show any amounts you converted from your traditional IRA, SEP IRA, or SIMPLE IRA to a Roth IRA. They are shown in box 3. See the Form 1040 or 1040A instructions for information on how to report rollovers. If you have ever made any nondeductible contributions to your traditional IRA or SEP IRA and you did not roll over the total distribution, use Form 8606, Nondeductible IRAs, to figure the taxable amount. If property was rolled over, see Pub. 590.

Box 3. Shows the amount converted from a traditional IRA, SEP IRA, or SIMPLE IRA to a Roth IRA in 2008. Use Form 8606 to figure the taxable amount.

Box 4. Shows amounts recharacterized from transferring any part of the contribution (plus earnings) from one type of IRA to another. See Pub. 590.

Box 5. Shows the fair market value of your account at year end. However, if a decedent's name is shown, the amount reported may be the FMV on the date of death. If the FMV shown is zero for a decedent, the executor or administrator of the estate may request a date-of-death value from the financial institution.

Box 7. May show the kind of IRA reported on this Form 5498.

Box 8. Shows SEP contributions made in 2008, including contributions made in 2008 for 2007, but not including contributions made in 2009 for 2008. If made by your employer, do not deduct on your income tax return. If you made the contributions as a self-employed person (or partner), they may be deductible. See Pub. 560.

Box 9. Shows SIMPLE contributions made in 2008. If made by your employer, do not deduct on your income tax return. If you made the contributions as a self-employed person (or partner), they may be deductible. See Pub. 560.

Box 10. Shows Roth IRA contributions you made in 2008 and through April 15, 2009. Do not deduct on your income tax return.

Box 11. In accordance with the Worker, Retiree, and Employer Recovery Act of 2008, the requirement to take minimum distributions from retirement accounts has been suspended for the 2009 tax year ONLY.

For additional information, please see the enclosed brochure, *Understanding Your 2008 Form 5498*.

If you make any IRA contributions for 2008 between January 1 - April 15, 2009,

EAI **Estimated Annual Income (EAI) & Estimated Yield (EY)** - EAI is an estimate of annual income for a specific security position over the next rolling 12 months. EAI may be negative on short & EY positions. EY is calculated by dividing the current EAI for a security position by its statement closing date market value. EAI and EY are estimates only and may include return of principal and/or capital gains, which would render them overstated. Actual income and yield might be lower or higher than the estimated amounts. For calculation details, refer to the "Additional Information and Endnotes" section.

Message about your CD: The prices shown for Certificates of Deposit (CDs) are generally estimates based upon matrix or model pricing methodology provided by an independent third-party. CDs may be priced at face value for up to seven calendar days from date of issue if estimated prices have not been received from the third-party pricing vendor. If no price is shown, an estimated market value was not available on the day your statement was generated. The prices shown for CDs may not represent the actual price you would receive if sold prior to maturity. If you hold your CD until maturity, you will receive the CD's face value and all accrued unpaid interest, assuming no issuer default.

Total Cost Basis does not include the cost basis on core, money market or other positions where cost basis is unknown or not applicable.

AI **(Accrued Interest)** - Represents interest accumulated since the last coupon date, but not yet paid by the issuer or received by NFS. There is no guarantee that AI will be paid by the issuer. Please refer to the Help/Glossary section of Fidelity.com for additional information.

Equity Dividend Reinvestment Shares credited to your account (DTC) Price transactions by FBS acting as agent for your account, or the Depository Trust Company (DTC) Price Information/Total Market Value The Total Market Value has been calculated out to 9 decimal places; however, the individual unit price is displayed in 5 decimal places. The Total Market Value represents prices obtained from various sources, may be impacted by the frequency with which such prices are reported and such prices are not guaranteed. Prices received from pricing vendors are generally based on current market quotes, but when such quotes are not available the pricing vendors use a variety of techniques to estimate value. These estimates, particularly for fixed income securities, may be based on certain minimum principal amounts (e.g. \$1 million) and may not reflect all of the factors that affect the value of the security, including liquidity risk. The prices provided are not firm bids or offers. Certain securities may reflect N/A or unavailable where the price for such security is generally not available from a pricing source. The Market Value of a security, including those priced at par value, may differ from its purchase price and may not closely reflect the value at which the security may be sold or purchased based on its various market factors. The sale or redemption of any fixed income security prior to maturity may result in a loss. Prices for Certificates of Deposits (CDs) on your statement are generally estimates and are not based on actual market prices. The secondary market for CDs is generally illiquid. You should always request a current valuation for your securities prior to making a financial decision or placing an order.
